1. Parse the cite key

Use the active token to infer a first author + publication year

2. Use sentence context

Nearby words like “Gaia” and “triples” help rerank plausible ADS matches

3. Pick the best results

Select the paper and OverCite will rewrite the cite key and inserts BibTeX automatically

10,000 Resolved Triples from Gaia: Empirical Constraints on Triple Star Populations

Shariat, Cheyanne, El-Badry, Kareem, Naoz, Smadar | 2025

We present a catalog of ~10,000 resolved triple star systems within 500 pc of the Sun, constructed using Gaia data. The triples include main-sequence, red giant, and white dwarf components spanning separations of 10-50,000 au. A well-chara…

Triple Evolution Pathways to Black Hole Low-mass X-Ray Binaries: Insights from V404 Cygni

Shariat, Cheyanne, Naoz, Smadar, El-Badry, Kareem et al. | 2025

A recent discovery shows that V404 Cygni, a prototypical black hole low-mass X-ray binary (BH-LMXB) is a hierarchical triple: the BH and donor star are orbited by a 1.2 M_⊙ tertiary at a distance of at least 3500 au. Motivated by…
